PROFESSIONAL SUMMARY

Computer science student with experience in full-stack development and AI applications. Built real-world projects including a finance platform and AI-driven systems, along with freelance work. Skilled in React, backend APIs, LLMs, RAG, and MCP, with a focus on building scalable, user-centric solutions.

EDUCATION

BTech in Computer Science and Engineering **2024-2028**
NMAM Institute of Technology
CGPA: 9.33 Udupi, Karnataka

WORK EXPERIENCE

Freelance Web Developer **Jan 2024 – Present**
Self-Employed India

- Developed a wood calculator and billing system to automate cost estimation and invoice generation
- Built a responsive website for Dhanyapuri Backwaters, improving digital presence and user experience
- Designed user interfaces and backend functionality, collaborating with clients to deliver solutions on time

PROJECTS

MoodMate (Multimodal Stress Detection System)| React, Flask, RAG, IBM Granite LLM

- Developed a multimodal AI system for stress detection by analyzing text, voice, facial expressions, and typing patterns, integrating IBM Granite LLM with RAG for personalized insights
- Built a full-stack React and Flask system with real-time chatbot and therapist emergency support
- Secured 2nd Place at Mindscape IBM Hackathon for developing an AI-based multimodal solution

Cloth Rental System| Node.js, React, PostgreSQL, Prisma, JWT, Cloudinary

- Built a full-stack rental platform using React (Vite) and Express, implementing APIs for pricing and inventory
- Designed a Prisma/PostgreSQL schema for users, rentals, coupons, and reviews with JWT auth and RBAC
- Integrated Cloudinary and Multer for efficient image upload and media management

Do4U (Service Marketplace Platform) | FastAPI, React, PostgreSQL, Supabase

- Built a full-stack service marketplace with job posting, chat, and AI-based pricing using React and FastAPI
- Developed async FastAPI backend with PostgreSQL, JWT authentication, role-access, and transaction workflows

SpendX (Financial Management Platform) | Next.js, TypeScript, MongoDB, Firebase

- Built a full-stack finance platform for expense tracking, budgeting, and multi-currency transactions
- Integrated Firebase authentication and APIs for currency conversion and AI-based insights
- Designed an interactive dashboard for spending analysis with a responsive UI

TECHNICAL SKILLS

- Languages | JavaScript, TypeScript, Python, SQL, HTML, CSS
- Frameworks & Libraries | React, Next.js, FastAPI, Flask, Express, Tailwind CSS
- Databases & Tools | MongoDB, PostgreSQL, Prisma, Supabase, Firebase, Neon DB
- Developer Tools | Git, GitHub, VS Code, Cursor, Postman, Figma
- AI & Technologies | LLMs, RAG, IBM Granite, Claude, REST APIs

ACHIEVEMENTS

- Secured **2nd Place in the Mental Health Track at IBM Mindscape Hackathon (BNMIT, Bangalore)**
- Achieved **3rd Place in CTF** cybersecurity event at **Hackfest 2026**, competing among 50+ teams nationwide
- Selected as a finalist at Hackfest (2025) a national level 36 hour hackathon and in HackXpo (2025, 2026)
